

# Security that doesn't require your attention.

Higher protection levels available the moment you need them.

As of 2026-04-30 · Prottime — AI inbox assistant with news briefing

## What's included in the Team standard

- ✓ **Swiss or EU data residency.** ISO 27001-aligned security management, external penetration test report on request.
- ✓ **Data Processing Agreement** (GDPR Art. 28 / nFADP Art. 9). **Cyber insurance** available thanks to ISO-aligned ISMS. **Personal founder liability of CHF 250,000** in case of intent under Swiss data protection law.
- ✓ **OAuth access revocable by you at any time** — through your Microsoft or Google admin console, single click. Prottime is immediately cut off from inbox access, no contract clause, no waiting period. You keep the kill switch.
- ✓ **In daily pilot use at Loeb AG** since early March 2026 — Swiss family business with 30 planned users from summer 2026.

## Three security tiers — you choose

**Tier applies company-wide** — the security setup applies to your entire firm, not to individual mailboxes. **Upgrades possible at any time**, but apply from the upgrade date forward — not retroactive on data already processed.

♦ EMPFOHLEN ♦		
<b>Team</b> Standard confidentiality	<b>Trust Tier</b> Elevated compliance	<b>Sovereign</b> Structural separation
<i>SMBs and family businesses without regulatory obligation</i>	<i>Mid-market and family offices with elevated compliance</i>	<i>Regulated industries or family-office principals</i>
<b>INCLUDES:</b> Standard security per points listed above	<b>EVERYTHING IN TEAM, PLUS:</b> <b>Data encrypted</b> , key held by an independent Swiss/EU custodian (not by Prottime) · <b>Data access log</b> on your side · software changes publicly verifiable · optional <b>trustee oversight</b> by your chosen person of trust	<b>EVERYTHING IN TRUST, PLUS:</b> Software runs in <b>your cloud</b> · code updates require your approval · optionally your own LLM with no external provider
